INTERIOR DESIGNERS: BRETT JOHNSON, MAINE STREET DESIGN COMPANY; BRUCE BUTLER, BY DESIGN ARCHITECTURE

ARCHITECT: BRUCE BUTLER

BUILDER: WRIGHT-RYAN CONSTRUCTION

FIREPLACE: FRESHWATER STONE

FURNITURE & PILLOWS: MAINE STREET DESIGN COMPANY

PHOTOGRAPHER: FRANÇOIS GAGNÉ

LOCATION: BRUNSWICK

Maine Street Design Company (MSDCo.) worked with architect Bruce Butler and Wright-Ryan Construction to update a post-and-beam home built from repurposed lumber with views of an ever-changing tidal cove. The oyster farmers, clam diggers, and kayakers that share the waterways in the distance served as the inspiration for the design team.

A cozy living area was created using two facing sofas along with two swivel chairs positioned in front of a dramatic fireplace clad in Freshwater Pearl granite. Although the spaces feel airy and open, the rooms are small, making efficient space planning crucial and creating a unique challenge for the design team.

The artwork throughout the home is photography taken by the client that was curated within the space by Brett Johnson and framed and installed by Tony Cox of Casco Bay Frames. The upholstered furniture is all custom-made in the United States and sourced through MSDCo. Shop. The upholstered fabrics are all extra durable blue and white Crypton, to hold up to the rigors of grandchildren. The pillow and accent fabrics invoke the sea, marine life, and fisheries. The wood beams were painted white, creating a more modern feeling in the space, and the walls and ceilings were all painted in soft Edgecomb Gray from Benjamin Moore. The flooring and other architectural details are white oak, and the fireplaces were all finished in Maine Freshwater Pearl granite with iconic affect.
